🏆 RestoPulse vs. Petpooja: Master Sales Battlecard & Manam Restaurant Pitch Guide

This document is your tactical blueprint to pitch, demo, and close **Manam Restaurant (Velachery)** and defeat Petpooja across Chennai restaurants.

---

1. 📊 Petpooja Actual Pricing Reality vs. RestoPulse

You noticed that Petpooja hiked their renewal price from ₹10,000 to ₹14,000+. Here is the verified breakdown of Petpooja's actual pricing model:

Petpooja Pricing Structure (India)

Item / Addon	Petpooja Real Cost (Per Outlet/Year)	RestoPulse Cloud ERP
Base POS Software	**₹12,000 to ₹14,000 + 18% GST** (~₹16,500/yr) *(Hiked every year!)*	**Flat Affordable Plan** (e.g., ₹599/mo or ₹5,999/yr)
Operations Manager (KDS, Waiter App, Tokens)	**₹20,000 to ₹30,000 + GST** *(Sold as expensive extra)*	**Included Free** (Floor Plan, KOT, KDS on any tablet)
Marketing & CRM (Customer Loyalty, SMS)	**₹20,000 to ₹40,000 + GST** + per-SMS gateway packs	**Included Free** (VIP Loyalty CRM built-in)
WhatsApp Bill Receipts	Charged per message via WhatsApp Business API (~₹0.40–₹0.80 per bill)	**100% Free & Unlimited** (Uses direct deep-links, ₹0 API cost)
Dynamic On-Screen UPI QR	Requires purchasing their proprietary soundbox / EDC machine	**Included Free** (Dynamic on-screen UPI QR for exact amount)
Hardware Requirement	Often pressures owners into buying their ₹30,000–₹45,000 touch terminals	**Hardware-Agnostic** (Runs on existing laptops, tablets, or phones)
Total Out-of-Pocket Per Year	**₹25,000 to ₹60,000+ / Year**	**₹5,999 / Year (All-Inclusive)**

> [!CAUTION]
>
> **Petpooja's Hidden Trap:** Petpooja lures restaurant owners with a low entry price in Year 1 (₹10,000), but once the restaurant's entire billing and menu is locked in, they hike renewals to ₹14,000–₹16,000+ and force owners to buy ₹20,000 add-ons for KDS, waiter captain ordering, and SMS credits!

---

2. ⚡ The 5 "Killer Advantages" of RestoPulse Over Petpooja

When talking to any restaurant owner, highlight these five pain points that Petpooja causes:

1. **No Hardware Lock-in (Save ₹35,000 on Setup):**

- *Petpooja:* Tries to sell heavy, expensive POS touch machines and dedicated thermal boxes.
- *RestoPulse:* Runs in Chrome on any Windows laptop, iPad, Android tablet, or phone. Standard USB / Bluetooth thermal printers (58mm or 80mm) connect in 1 click.

2. **Zero-Cost WhatsApp Receipts (Save ₹10,000/yr on SMS):**

- *Petpooja:* Charges for third-party SMS/WhatsApp gateways. If an outlet bills 100 orders a day, that's 36,500 messages = ₹15,000–₹25,000 in message costs!
- *RestoPulse:* Generates direct WhatsApp deep-links with zero gateway bills. 100% free forever.

3. **Dynamic UPI QR Code (Zero Cash Mishandling & Free):**

- *Petpooja:* Requires expensive payment gateway integrations or static counter standees where customers type the wrong amount.
- *RestoPulse:* Displays a dynamic QR on the counter screen with the exact bill amount (e.g., ₹963). Customer scans, pays, and leaves with zero cash handling mistakes.

4. **Kitchen Display System (KDS) & Floor Plan Included (Free):**

- *Petpooja:* Charges an extra ₹20,000+ for the "Operations Manager" tier to get KDS and Captain ordering.
- *RestoPulse:* Visual Dine-in Floor Plan (T1–T12), Table KOTs, and full-screen KDS chef tablets are built into the core platform at no extra fee.

5. **Dum Deg & Kitchen Depletion Tracking (For Biriyani & Starters):**

- *Petpooja:* Only tracks raw inventory in kg, which chefs refuse to maintain during peak dinner rush.
- *RestoPulse:* Real-time cooked portion countdown (e.g., 160 plates cooked $\rightarrow$ live countdown on counter orders and Swiggy/Zomato).

---

3. 🎯 Manam Restaurant (Velachery) Client Profile & Pitch Plan

4. 🗣️ The Exact Conversation Script for Your Friend at Manam Restaurant

When you visit or call your friend who runs Manam Restaurant, follow this 4-step script:

Step 1: The Renewal Cost Shock (Hook)

> *"Bro, Petpooja is hiking everyone's subscription right now. Last year they charged ₹10k, this year they are asking ₹14k to ₹16k+ with GST. And if you want KDS for the kitchen or customer WhatsApp bills, they charge ₹20k extra. Why pay ₹30,000–₹40,000 every year just for software?"*

Step 2: The Late Night (4 AM) Advantage (Value)

> *"Your restaurant is open till 4 AM opposite Phoenix Market City. During late night rush, you have families inside and takeaway orders outside. I built a modern Cloud POS system called **RestoPulse** specifically for Chennai high-volume restaurants."*

Step 3: Show Him His Own Restaurant Live on Phone (The "Magic" Moment)

> *Open your phone and show him: `https://spotlight-biriyani.vercel.app/manam` *

> *"Look, I already made your custom digital menu page with your exact address opposite Phoenix Market City and your late night specials!"*

Step 4: The 7-Day Zero-Risk Trial (Close)

> *"Let me set you up with a 100% free 7-day live trial on your existing counter laptop or tablet. You don't pay a single rupee. If it runs smoother, saves your cashier time, and saves you ₹20,000 every year compared to Petpooja, then we talk. Fair enough?"*
