Customising for a new client (resell kit)

Rebranding this for another restaurant takes about 30-60 minutes.

1. Name, menu and branches

`src/lib/pos-store.ts` the `seed()` function:

- `branches` - names, addresses, phones
- `items` - dish name, category, counter price, online price, plate cost
- `stock` - raw materials, units, reorder levels, cost per unit
- `channels` - commission % and packing cost
- `settings.businessName`

Existing installs keep their old data, so also change it in the UI (Settings / Menu & Costs)

or ask the client to press *Reset to demo data* once after the update.

2. Colours and fonts

`src/styles.css` only. Change `--primary`, `--accent`, `--background`, `--card` (all `oklch`)

and the `--font-display` / `--font-sans` families (also update the Google Fonts `<link>`

in `src/routes/__root.tsx`). Never hardcode colours in components.

3. Photos

Replace `src/assets/hero-biriyani.jpg`, `mutton.jpg`, `kushka.jpg` with the client's

own shots (same file names = zero code change). Keep them under ~400 KB.

4. Website copy and SEO

Each route file has a `head()` block - update title, description, og:title, og:description

per page. Text lives in the same file.

5. Add a category

`CATEGORIES` in `src/lib/pos-store.ts` + the `Category` union type. Menu page and

Billing tabs pick it up automatically.

6. Common paid add-ons (quote separately)

| Add-on | What it needs | Suggested price (INR) |

| --- | --- | --- |

| Cloud sync + logins for 3 branches | Lovable Cloud / Supabase, auth, RLS | 25,000-60,000 one-time + monthly |

| Recipe (BOM) auto stock deduction | recipe table per item; deduct on each bill | 15,000-25,000 |

| Fixed cost & real net profit module | rent/salary/electricity entry + monthly P&L | 10,000-18,000 |

| Staff attendance & shift wise sales | new tables + reports | 15,000+ |

| WhatsApp daily summary to owner | WhatsApp Business API / Twilio | 12,000 + usage |

| Customer loyalty by phone number | customer table, points, redemption | 20,000+ |

| Swiggy/Zomato order auto-import | partner API approval required | project quote |

| GST-compliant invoice + GSTR export | GSTIN fields, HSN, tax split | 15,000-25,000 |
