Spot Light Manager

Smart Business Solution for Restaurants

Modern billing, stock, and profit management for growing food businesses

The challenge

Restaurant owners often manage billing, stock, and profit manually. This leads to delays, errors, poor visibility, and weak decision-making.

Our solution

Spot Light Manager brings all essential operations into one simple platform.

What it helps with

- faster billing
- better stock control
- clearer profit visibility
- smarter daily reporting
- stronger business discipline

Core features

Billing

- fast order entry
- channel-based pricing
- discount and payment tracking
- profit visibility before bill save

Stock management

- raw material tracking
- reorder alerts
- purchase and usage history
- wastage tracking

Reporting

- sales summary
- item-wise performance
- branch-wise visibility
- forecast support

Who can use this

- biriyani shops
- restaurants
- cloud kitchens
- tiffin centers
- growing food businesses

Pricing options

Starter plan

Basic setup for a small shop

- suitable for first-time users
- essential billing and stock tools
- lower monthly cost

Growth plan

For expanding businesses

- enhanced reporting
- better support
- more operational visibility
- suited for growing shops and branches

Pro plan

Premium support and advanced business control

- advanced analytics
- stronger reporting
- more complete business support
- ideal for larger or fast-growing businesses

Why this is valuable

This solution helps the owner save time, reduce mistakes, and understand the business more clearly.
