Spot Light Manager - Premium Client Proposal

Executive summary

Spot Light Manager is a modern digital operating system for restaurants, biriyani shops, and cloud kitchens. It gives owners a cleaner and more structured way to run billing, stock, profitability, and reporting without relying on manual processes.

Designed for business owners who want growth with better control, this platform transforms everyday operations into a more professional, data-driven system.

Why this matters

Restaurant owners often lose money not because of low demand, but because of poor visibility. Without clear billing control, accurate stock tracking, and profit reporting, business decisions become guesswork.

Spot Light Manager solves this by giving the owner a single place to understand:

- what sells most
- what is truly profitable
- what stock is running low
- what online platforms are contributing to business growth

What the solution includes

Business operations

- fast and simple billing
- branch-wise operations support
- stock and inventory control
- cost and profit visibility
- sales and forecasting reports

Customer-facing presence

- public website
- menu display
- branch details
- delivery and contact information

Business value

- improved speed at the counter
- better operational discipline
- stronger financial visibility
- higher confidence in daily decisions
- better readiness for future growth

Who this is for

This solution is highly suitable for:

- biriyani shops
- restaurants with delivery orders
- cloud kitchens
- tiffin and catering businesses
- growing food brands that need more control

Proposed implementation

We recommend a phased rollout:

1. Branding and setup
2. Menu and pricing configuration
3. Stock setup and reporting configuration
4. Staff onboarding and training
5. Ongoing support and future upgrades

Suggested pricing model

Option 1 - One-time implementation

Ideal for owners who want a fixed setup cost and long-term support.

Option 2 - Monthly subscription

Ideal for owners who want ongoing support, updates, and remote assistance.

Option 3 - Hybrid model

Best balance of affordability and long-term value.

Why choose this solution

- modern and professional user experience
- built specifically for restaurant operations
- practical for small and mid-size businesses
- scalable for future cloud and ERP upgrades
- designed to improve decision-making and profitability

Next steps

We recommend the following next steps:

- review the current workflow
- identify monthly sales and costs
- confirm menu and pricing structure
- agree on deployment approach
- start implementation and training

Closing

Spot Light Manager is not just a software tool. It is a practical operating system for modern restaurant growth and business control.
