Spot Light Manager - Sales Deck Version

1. Problem

Restaurant owners lose time and money because operations are still manual.

Common issues:

- billing is slow and error-prone
- stock is not tracked properly
- profit is not visible clearly
- online platform commissions are hard to understand
- reports are not available in real time

2. Solution

Spot Light Manager brings billing, stock, cost, and profit reporting into one simple system.

This helps the owner run the shop more professionally and make better decisions every day.

3. What the product does

- fast billing
- stock management
- real-time profit insights
- branch-ready structure
- reporting and forecasting
- public website and business presence

4. Why customers buy it

- saves time
- reduces errors
- increases visibility
- improves control over operations
- gives the owner confidence in daily decisions

5. Business value

This is not just an app. It is a practical business tool that improves how the shop operates.

6. Suggested pricing

- One-time setup: Rs. 35,000 - Rs. 60,000
- Monthly support: Rs. 1,499 / branch or more

- Cloud / advanced features: available as add-ons

7. Next step

Book a short demo and we will customize the system for the client's shop.
